

Trace Solution Suite

Fast, efficient ways to collect and detect

Every day that passes without being able to locate a debtor costs you time and money. Now, you can get the search information you need to speed up your collections efforts and improve fraud detection and prevention.

TransUnion's Trace Solution Suite gives you access to the most comprehensive and current information available—information that can help you minimise losses and increase your business effectiveness.

Reporting options that fit the way you work

We provide both comprehensive and stand-alone modular reports that include:

- Current consumer information such as address, telephone and employer information
- Fraud details such as ID verification and address frequency information
- Historical address information
- Adverse details including defaults, judgments and notices
- Payment profile information—available to CPA members only
- Enquiry information
- Deeds linked to the individual you are tracing
- Companies linked to the individual you are tracing
- Other individuals linked to the traced subject based on shared information
- Ability to load Trace Alerts on an individual and receive an instant email notification when updated contact information is available

Broaden the depth of your trace search to return wider results

Trace Solution Suite is designed to get you the exact information that you're looking for, even if you have limited information on the subject:

SOLUTIONS SUITE

Individual Trace

A deep consumer search solution that returns a comprehensive set of search results based on the information you have entered into your search.

Linkages Modules

Give you the ability to find connection points between multiple individuals based on shared information such as telephone numbers, addresses and adverse information.

Trace Alerts

Provide you with instant email notifications when TransUnion receives updated contact information on the individuals specified by you.

Business Trace

Gives you access to pertinent information relating to a business, including where there are other businesses that share contact information with that particular business.

Use Individual Trace in multiple ways to:

- Improve collections capability
- Identify syndicate activity
- Facilitate the payment of unclaimed benefits

Get flexibility to see the information you need, the way you want to see it, including:

- Partial and comprehensive search options
- Ability to pull multiple reports simultaneously
- View other consumers linked to the primary individual you are tracing
